EDUCATION

University of Massachusetts Amherst

Feb 2023 - Dec 2024

Master of Science, Computer Science

Amherst, MA, USA

- **Relevant Coursework:** Advanced Natural Language Processing, Systems for Data Science, Algorithms for Data Science, Distributed Computing and Operating Systems

Indian Institute of Information Technology, Kancheepuram

August 2017 - May 2021

Bachelor of Technology, Computer Science, CGPA: 8.77/10

Chennai, India

- **Relevant Coursework:** Computer Networks, Computer Architecture, Computer Vision, Database Systems, Advanced Data Structures and Algorithms, Machine Learning

EXPERIENCE

Global Payments | *React, Springboot, Redux*

June 2024 - August 2024

Full Stack Developer Intern

Atlanta, USA

- Developed a React-Redux feature for an internal website, enabling WSDL file upload, visualization, editing, and backend updates. Replaced a \$50k/year third-party application, driving significant cost savings.

Lowe's | *Go, Kubernetes, Ansible, Docker*

Aug 2021 - Dec 2022

Software Engineer

Bengaluru, India

- Built an on-premise internal compute platform for infrastructure and platform engineering operations, utilizing technologies such as Go, Jenkins, Ansible, JFrog, Docker, Istio, Rancher across the platform.
- Implemented the platform, utilizing Vault for secure access and leveraged Kubernetes Operators, Operator SDK, and Kubernetes controllers to optimize management and streamline automation processes.
- Enhanced deployment and application management through Helm, ArgoCD and Grafana visualizations.

Quantrium Technologies | *Python, Sklearn, Machine learning*

Dec 2020 - Jun 2021

Machine Learning Intern

Chennai, India

- Solely developed dynamic rule engine utilizing classification models (Decision Trees, Random Forest, Bagging Classifier, Ripper, CN2) to automatically generate accurate rules from diverse datasets.
- Preprocessed datasets by handling missing values and balancing datasets using techniques like SMOTE.

QuantQAlgo | *React, NodeJs, Socket.io, Django, AWS*

Aug 2020 - Dec 2020

Software Engineering Intern

Orissa, India

- Developed a trading system web application with ReactJS and Django, integrating real-time stock data, technical analysis indicators (RSI, MACD), paper trading, backtesting strategies, and dashboards for top gainers/losers.
- Contributed to backend strategy development by collecting historical data, implementing trading indicators and algorithms to generate buy/sell signals, and frontend for dashboards, backtesting, and paper trading features.

Ciphense | *OpenCV, Deep learning, Tensorflow, Pytorch, Flask*

May 2020 - Sep 2020

Machine Learning Intern

Bengaluru, India

- Engineered a facial recognition engine using deep learning models like MTCNN and FaceNet for face detection.

RESEARCH

Lexalytics | *LLMs*

Feb 2024 - May 2024

Graduate Student Researcher

Amherst, MA

- Leveraging LLM embeddings to infer hidden author traits from reviews, providing insights into personalized customer experiences and analyzing their impact on review variance for products or services, with BERTopic as the baseline.

PROJECTS

Transliteration | *Pytorch, sklearn*

- Implemented Seq2Seq models using transformer and CNN architectures for transliteration across 19 Indic languages, leveraging ensemble techniques and phonetic auxiliary tasks to enhance accuracy across 26M transliteration pairs.

FaceForensics++ | *Matlab, TensorFlow, ComputerVision, OpenCV*

- Built deep learning classifier with Xception network to detect fake videos, optimizing accuracy via hyperparameter tuning and image processing on dataset of over 1.8 million manipulated facial images from techniques like DeepFakes.

TECHNICAL SKILLS

Languages: Java, Python, Golang, C, C++, JavaScript, TypeScript, C#, SQL

Technologies: React, Node.js, Django, Flask, Kubernetes, REST, HTML/CSS, Selenium, Socket.io, NGINX, Material-UI, Ansible, Springboot, AWS, Docker, MySQL, MongoDB, PostgreSQL, Kafka, ArgoCD

AI: Machine Learning, Deep Learning, TensorFlow, scikit-learn, OpenCV, PyTorch, NLTK

Developer Tools: Git CLI, GitHub, VS Code, Eclipse, UNIX/Linux, Windows, IntelliJ, Jenkins, BitBucket PostMan, JIRA, Figma(UI)
